

RISC-V Server Platform Compliance Test Suite(CTS) Proposal

Dec 7, 2023

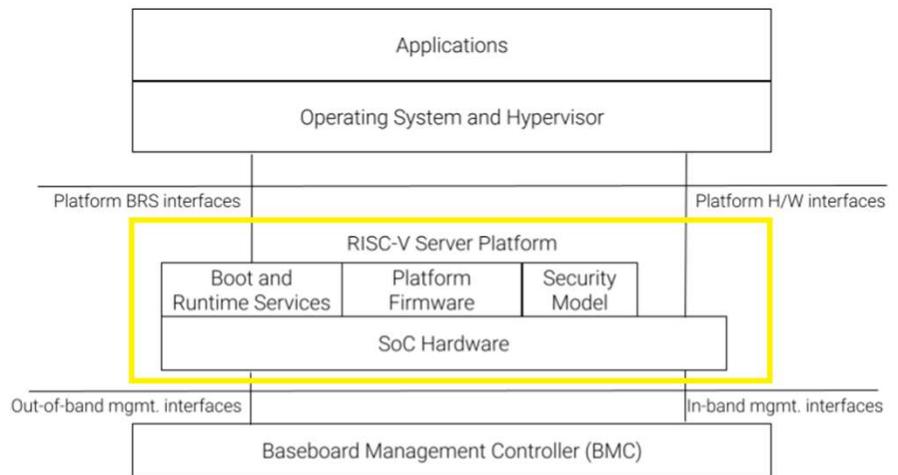

Intel RISCV SW Team

intel.[®]

Background

- <https://lists.riscv.org/g/tech-server-platform>
- The Server Platform Task Group shall define a specification for a standardized set of hardware and software capabilities, that portable system software (such as operating systems and hypervisors) can rely on being present in a RISC-V server platform.
- <https://github.com/riscv-non-isa/riscv-server-platform>

Components of a RISC-V Server Platform

Goal

Proposal a RISC-V Server Platform Compliant Test Suite to verify and certify that implementations are following related RISC-V Server Platform standards.

Porting work
are needed!

RISC-V Server Platform CTS Proposal – Repository

RISC-V Server Platform CTS Proposal – Build/Run

Action Required

- Setup Server Platform CTS repository
- Sync with Server SoC TG
 - Qemu RISC-V Server SoC machine([ref sbsa-ref](#));
 - Test cases and repository
- Sync with PRS/BRS TG
 - SBI test and repository
 - BRS test suite repository
- Sync with Security Model TG
 - Server Platform Security Requirement([ref BBSR](#)) and test
- Sync with RISE FW/Kernel WG
 - EDK2 platform package for RISC-V Server Platform([ref SbsaQemu](#));
 - Linux ACPI/SMBIOS etc.

The Intel logo is displayed in white against a solid blue background. The word "intel" is written in a lowercase sans-serif font. The letter "i" features a small blue square at its top. A registered trademark symbol (®) is located at the bottom right of the "l".
